PROFILE

Fourth-year Epitech student on an exchange year in Seoul. I design, deploy and run robust web applications, from architecture to production.

EXPERIENCE

Co-Founder SafeLedger · France · Hybrid — February 2026 – Present

- Lead the technical development of a mobile and web digital vault for personal belongings.
- Own the architecture, deployment and infrastructure.

Software Engineer Intern Jet Aviation · Basel, Switzerland — April 2026 – August 2026

- Technical lead of an internal automation platform built on autonomous agents.
- Full-stack TypeScript and React solution, deployed on Azure across the group.

Teaching Assistant Epitech · Mulhouse, France — February 2025 – March 2026

- Technical mentoring of students and supervision of educational activities and exams.

Software Engineer Intern CAP Vision · Rouffach, France — July 2024 – December 2024

- Web apps in C# and mobile apps with Angular and Ionic.
- AI-powered invoice automation extension for Dynamics 365 Business Central.

PROJECTS
